Flag: Follow up

Ryan,

Just wanted to follow-up from our phone conversation earlier. As discussed we are a weekly 24hr composite for MAJSA locally. If you need further information reach out. I will await the draft changes for review.

Thank you again.

Best Regards,

Alex Patterson

EHS Manager

Sapa is the world leader in aluminium solutions – a new company that has joined the aluminium extrusion businesses of Sapa and Hydro. Together, we are shaping a lighter future through a global reach and local presence within extrusions, building systems, and precision tubing. We have 23,000 employees in more than 40 countries, and our headquarters are located in Oslo, Norway.

Subject: FW: Discharge Limitations and Monitoring Requirements PAP245985

Alex: Could you address this? Let me know if you need anything.

Ryan: Linda Campbell no longer works for Sapa. Alex Patterson is the EHS Manager for the Mountain Top facility

Subject: Discharge Limitations and Monitoring Requirements PAP245985

Hello Mr. Long,

Our office is contacting you in an effort to update SAPA Extruders Discharge Limitations and Monitoring Requirements issued December 2013. We are working on updating the limitations and editing the monitoring requirement language. In order to correctly update the monitoring requirements, can you please send us a sampling plan outlining the sample types and sample point?

I have attached a fact sheet with our current understanding of your facility. Please send us corrections to the fact sheet as appropriate. Feel free to contact me with any questions you may have.

Sincerely,

Ryan Shuart
